Meherbai Tata Memorial Hospital: Providing Comprehensive Cancer Care

Category: Business
written by International Khabar | February 19, 2024

Meherbai Tata Memorial Hospital (MTMH) is a renowned cancer hospital located in Jamshedpur. Established in 1975, the hospital was specifically designed to cater to the needs of cancer patients in the region. Named after Lady Meherbai Tata, the esteemed wife of Sir Dorabji Jamshedji Tata, MTMH has been at the forefront of providing exceptional cancer care.

MTMH is situated on a plot of land generously gifted by Tata Steel, in close proximity to Tata Main Hospital. The hospital was inaugurated on February 4, 1975, by J R D Tata, the then Chairman of Tata Sons. Since its inception, MTMH has continuously evolved and embraced advanced technologies to enhance the quality of cancer treatment.

One of the notable advancements at MTMH is the Linear Accelerator (Varian Truebeam LINAC), which enables the hospital to provide various types of precision radiotherapy

treatments. These treatments include Conventional, 3DCRT, IMRT, SBRT, SRS, and more. The Linear Accelerator ensures accurate targeting of cancer cells, minimizing damage to healthy tissues.

In addition to radiotherapy, MTMH also offers chemotherapy services. The hospital's dedicated Tumour Board plays a crucial role in discussing and advising the best line of management for each individual patient. This multidisciplinary approach ensures that patients receive comprehensive and personalized care.

MTMH is equipped with a state-of-the-art facility for HDR Brachytherapy, utilizing the GammaMed plus iX system. This advanced technique allows for targeted radiation therapy directly to the tumor site, maximizing treatment effectiveness.

At MTMH, early detection of cancer is a priority. The hospital houses a Cancer Detection Clinic (CDC) where patients can undergo screenings and tests to identify potential cancerous conditions at their earliest stages. Early detection greatly increases the chances of successful treatment and recovery.

Aside from its cutting-edge medical facilities, MTMH also prioritizes the well-being and comfort of its patients. The hospital provides a supportive and nurturing environment, ensuring that patients and their families feel cared for throughout their cancer journey.

MTMH understands the emotional and psychological toll that cancer can have on patients and their loved ones. To address these concerns, the hospital offers counseling services and support groups, providing a network of individuals who can offer guidance, empathy, and understanding.

With a dedicated team of highly skilled doctors, nurses, and support staff, MTMH is committed to delivering the highest standard of cancer care. The hospital's mission is to provide

comprehensive and compassionate treatment, focusing on the unique needs of each patient.

Meherbai Tata Memorial Hospital continues to be a beacon of hope for cancer patients in Jamshedpur and the surrounding regions. Through its advanced technologies, multidisciplinary approach, and patient-centered care, MTMH strives to improve outcomes and enhance the quality of life for individuals battling cancer.
