India's Premier ISO 9001:2015 Certified Intelligence and Detective Agency Strengthens Pan-India Strategic Footprint Across Major Metros and Tier-II/III Hubs to Deliver Unprecedented Local Agility and Enterprise-Grade Due Diligence for Corporates and Individuals

JAMSHEDPUR, JHARKHAND, INDIA – NIDAAN Intelligence Services

(I) Private Limited, widely recognized as India’s leading ISO 9001:2015 certified private intelligence, investigation, and risk consulting organization, today officially announced a major operational expansion with the strategic deployment of 41 specialized Business Managers stationed across key commercial capitals, metropolitan centers, and industrial corridors throughout India. This milestone initiative reinforces NIDAAN’s commitment to providing seamless, real-time, and highly confidential investigative, verification, corporate risk mitigation, and specialized manpower services to corporate conglomerates, multinational enterprises, financial institutions, legal practitioners, MSMEs, and individual clients nationwide.

As India’s business environment undergoes rapid digitization and exponential economic growth, the complexity of corporate fraud, intellectual property infringements, financial non-compliance, supply-chain vulnerabilities, and employment integrity risks has escalated substantially. In tandem, individual clients increasingly demand discrete, reliable, and legally compliant personal investigations and background verifications. NIDAAN’s strategic rollout of 41 regional Business Managers directly addresses this demand by providing boots-on-the-ground capability, deep localized intelligence, cultural familiarity, and immediate responsiveness backed by centralized quality governance and ISO 9001:2015 certified standard operating procedures.

A Robust Pan-India Presence: 41 Strategic Hubs Operating in Synergy

The newly appointed 41 Business Managers will act as dedicated regional heads and single-point-of-contact (SPOC) leaders across North, South, East, West, and Central India. Operating out of premier metropolitan centers (such as New Delhi, Mumbai, Bengaluru, Hyderabad, Chennai, Kolkata, Pune, and Ahmedabad) as well as emerging commercial nodes (including Jamshedpur, Chandigarh, Jaipur, Lucknow, Kochi, Indore,

Bhubaneswar, Patna, Guwahati, Vadodara, and Coimbatore), each manager brings specialized domain knowledge and extensive field networks.

By decentralizing ground operations while maintaining rigorous centralized case monitoring and quality assurance from its corporate headquarters, NIDAAN Intelligence Services ensures that complex cross-jurisdictional assignments—such as multi-state asset tracing, nationwide employee background checks, pan-India supply chain audits, or multi-city surveillance operations—are executed with unmatched agility, absolute precision, and zero bureaucratic turnaround delays.

Comprehensive Portfolio of Specialized Solutions

Under the purview of these 41 Business Managers, NIDAAN Intelligence Services is extending its full-spectrum service portfolio across all territories, catering specifically to both B2B enterprise clients and private individuals:

1. Corporate & Forensic Investigation: In-depth investigations into corporate espionage, financial irregularities, white-collar crimes, internal asset theft, IP/trademark counterfeiting, covert surveillance, competitor intelligence, and vendor kickback schemes.

2. Comprehensive Verification & Due Diligence: Pre-employment and post-employment background screening, C-suite executive vetting, candidate credential verification, corporate vendor due diligence, business partner integrity assessments, and pre-M&A risk profiling.

3. Enterprise Risk Management & Loss Prevention: Threat vulnerability assessments, operational risk audits, supply chain loss prevention, warehouse security audits, crisis management consultancy, and business continuity advisory designed to safeguard corporate balance sheets and market reputation.

4. Strategic Manpower & Specialized Security Solutions: Deployment of meticulously vetted, highly trained security personnel, executive protection officers, facility defense guards, specialized task forces, and compliance-driven workforce solutions tailored to modern industrial, retail, and corporate facilities.

5. Cyber Intelligence & Digital Forensics: Digital evidence gathering, cyber fraud investigation, employee data leakage probing, electronic counter-surveillance (bug sweeping/TSCM), and digital footprint verification.

6. Matrimonial & Individual Private Investigation: Sensitive, highly confidential private intelligence services including pre-marital background checks, matrimonial fidelity verification, missing person tracing, divorce and child custody litigation support, and family asset validation.

Leadership Vision: Redefining Trust and Security Nationwide

> *"In today's volatile and highly interconnected economic landscape, trust must be validated by verifiable facts. NIDAAN was built on the pillars of absolute integrity, discretion, and unyielding accuracy. By appointing 41 dedicated Business Managers across India, we are breaking down regional operational barriers and empowering our corporate and individual clients with instant access to world-class investigative expertise and localized risk solutions. Whether a corporation in Mumbai requires rapid fraud verification in eastern industrial belts or a family in Delhi requires pre-marital due diligence in southern metros, NIDAAN provides seamless, legally defensible, and ISO-compliant intelligence across every pin code in India."*

Empowering Stakeholders: Why Corporates and Individuals Choose NIDAAN

For Corporate Clients, the expanded network eliminates the friction of managing fragmented regional vendors. NIDAAN offers centralized Master Service Agreements (MSAs), standardized Service Level Agreements (SLAs), enterprise-grade data security protocols adhering to stringent information privacy regulations, and customized executive reporting dashboards. Corporates can now execute multi-location employee screening drives, pan-India vendor verifications, and cross-state fraud investigations under one trusted umbrella.

For Individual Clients, privacy and confidentiality remain paramount. The 41 Business Managers provide empathetic, professional, and discreet consultations. Every inquiry is handled with strict non-disclosure safeguards, ensuring that personal matters—ranging from sensitive matrimonial background checks to asset and ancestry verifications—are investigated thoroughly without drawing unwanted attention or compromising client dignity.
