Sequretek Ensures Every Asset Matters with the Launch of Percept CTEM

Category: Business
written by International Khabar | June 25, 2025
[Sequretek](#), a global leader in AI-powered cybersecurity solutions, today launched its latest SaaS innovation: Percept CTEM. This groundbreaking platform aims to eliminate surprises by offering complete visibility into every asset within an organization, providing a proactive and predictive approach to managing risks.

Guided by the philosophy that every asset matters, Percept CTEM ensures continuous threat exposure management across the entire digital attack surface, recognizing that even a small, seemingly insignificant asset can be the entry point for a costly breach.

In today's evolving cybersecurity landscape, where threats are becoming increasingly sophisticated, organizations must recognize that no asset is too small to be ignored. Attackers exploit even the smallest vulnerabilities, and a breach can occur when an asset is overlooked. According to [Gartner](#), organizations that base their security investments on a continuous exposure management program by 2026 will be three times less likely to experience a breach.

Purpose-built to stay ahead of cyber adversaries, Percept CTEM promises **"Every Asset. Every Moment. No Surprises,"** giving organizations the power to proactively manage risk. Enhanced with AI, it prioritizes risk based on [business](#) context. The platform identifies vulnerabilities before they evolve into threats and offers automated mitigation recommendations. Unlike traditional security tools that may only focus on high-

value targets, Percept CTEM treats every asset, critical or not, with equal vigilance. It understands that every breach starts somewhere, and that one entry point can disrupt [business](#) operations.

"*Organizations frequently realize too late that a low-priority asset can serve as a backdoor for a security breach*," said **CEO & Co-Founder**[Pankit Desai](#). "*Percept CTEM ensures youre never caught off guard by continuously mapping and validating security across all systems, giving you peace of mind that every asset, no matter how small, is always protected*."

Percept CTEM integrates seamlessly with third-party tools and Sequretek's Percept security suite, including Percept XDR, NG SIEM, Percept Identity, Percept EDR, and Percept Compliance Manager, serving as an intelligent overlay that contextualizes data from existing tools. From asset discovery to automated remediation, it's security without blind spots.
