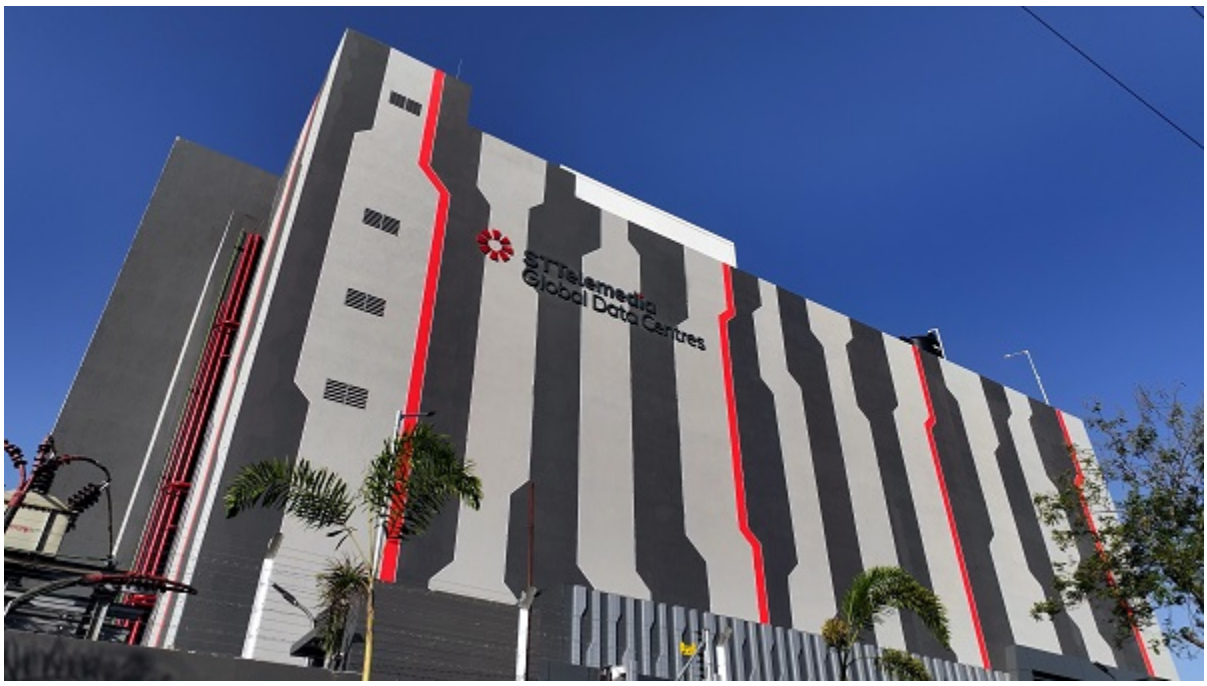
ST Telemedia Global Data Centres Launches Rajasthan's First High-Performance Data Centre

Category: Business
written by International Khabar | July 27, 2026

ST Telemedia Global Data Centres (India) (STT GDC India), India’s leading co-location data centre services provider, announces the launch of **STT Jaipur 1**, the first high-performance data centre in Rajasthan. The facility marks a significant milestone in the state’s digital transformation journey and reinforces STT GDC India’s commitment to enabling AI-driven innovation, cloud adoption, and enterprise digitalisation across emerging growth markets.



STT GDC India expands its footprint with STT Jaipur 1, Rajasthan’s first high-performance data centre, supporting cloud, AI, and enterprise workloads

As demand rises for more compute-intensive applications across industries, organisations are seeking infrastructure that can support high-performance workloads, scalable cloud environments and increasingly data-intensive use cases. **STT Jaipur 1** has been purpose-built to address these needs, providing resilient and scalable capacity for enterprises, government institutions, cloud providers and digital-native businesses in and around the region.

The launch also expands STT GDC India’s national footprint to 10 cities, 34 data centres, 613 MW IT Load capacity, reinforcing its role in extending high-quality digital infrastructure beyond Tier 1 markets and enabling emerging technology hubs such as Jaipur to participate more fully in India’s digital economy.

STT Jaipur 1 is being developed with an IT design capacity of

6 MW, a total power load of 10 MVA in a three-storey building with a campus area of 5,971 square metres. The facility has been designed in line with STT GDC India's long-term commitment to sustainable and responsible growth, with a strong focus on energy efficiency, operational resilience and ESG principles. This enables customers to scale their digital operations while advancing their sustainability goals.

Commenting on the launch, **Mr. Bimal Khandelwal, Chief Executive Officer of STT GDC India,** said, *"India's digital growth is being driven by increasing demand for data-intensive applications, cloud adoption and high-performance computing capabilities. Infrastructure will be critical in enabling this next phase of growth. The launch of STT Jaipur 1 represents a strategic investment in Rajasthan's digital future and reflects our conviction that the next wave of digital infrastructure growth will extend well beyond India's Tier 1 cities. Rajasthan is emerging as an important destination for technology-led investment and innovation. With STT Jaipur 1, we are bringing high-performance data centre capabilities to the region, enabling enterprises, cloud providers, and public sector organisations to scale securely and efficiently. As the state's first enterprise-grade data centre, this facility will play a pivotal role in supporting Rajasthan's digital economy and strengthening India's broader AI infrastructure ecosystem."*

With STT Jaipur 1, STT GDC India continues to expand its role as a key enabler of India's digital future, providing robust, resilient, future-ready infrastructure needed to power the nation's next decade of innovation and growth.

About STT GDC India

ST Telemedia Global Data Centres (India) is a leading AI-ready

co-location data centre services provider and a majority-owned subsidiary of STT GDC Pte. Ltd. (ST Telemedia Global Data Centres, Singapore). For more than two decades, the company has led the Indian colocation market, with a strong track record in designing, building and operating data centres. It manages one of the country's largest white space portfolios, with more than 613 MW of critical IT load across 34 facilities, including those under development, in 10 cities. STT GDC India serves a well-diversified customer base, including many Fortune 500 companies, and delivers mission-critical solutions through best-in-class offerings and industry-leading service quality and uptime.

STT GDC India is committed to achieving carbon-neutral data centre operations by 2030 and advancing responsible growth through a strong focus on ESG, safety, ethics, integrity and inclusion.
