

# When Compassion Meets Excellence: Saveetha Medical College & Hospital, SIMATS Signs MoU with Apollo Hospitals, Chennai

Category: Business

written by International Khabar | October 14, 2025

In a landmark move that redefines the future of affordable tertiary healthcare in India, Saveetha Medical College & Hospital, under [Saveetha Institute of Medical and Technical Sciences](#) (SIMATS), signed a Memorandum of Understanding (MoU) with Apollo Hospitals, Chennai, on 14th October 2025 at Kurinji Hall, SMCH.

## **Saveeetha Medical College & Hospital, SIMATS Signs MoU with Apollo Hospitals, Chennai**

This partnership bridges two healthcare giants – Saveeetha, known for its compassion and accessibility, and Apollo, synonymous with cutting-edge transplant care. Together, they bring the same world-class liver transplant expertise to patients at half the cost – ensuring that a life-saving surgery once reserved for the elite is now within reach of every Indian family.

### **A Milestone for Accessible World-Class Healthcare**

Under this collaboration, the Apollo transplant team will work hand-in-hand with Saveeetha's expert clinicians and researchers to expand access to advanced liver care and transplantation. The same specialists, same surgical precision, and same success rates that have made Apollo a global name will now be available at [Saveeetha Medical College and Hospital](#) – at a fraction of the private sector's usual cost.

### **What makes this historic is not just the science – but the philosophy**

At Saveeetha, healthcare is a right, not a luxury. This collaboration ensures that a farmer's child and a CEO's child can now receive the same liver transplant from the same surgeons – without financial ruin.

## **Saveetha – A National Leader in Medicine and Humanitarian Care**

Ranked 11th in India for Medicine and #13 for Research in the NIRF 2025 Rankings, Saveetha stands among India's most respected medical institutions. Its clinical excellence is matched only by its humanitarian scale – delivering over ₹1254 crore worth of free healthcare every year to underserved patients.

During the COVID-19 crisis, Saveetha emerged as one of India's Top 5 Private COVID Hospitals, lauded for its survival rates, infrastructure, and transparent care.

Walk into Saveetha's General Hospital, and you'll be forgiven for mistaking it for a corporate paradise – gleaming corridors, world-class ICUs, modular OTs, private suites, and robotic diagnostics – yet, the treatment costs remain among the lowest in India. It's not just a hospital; it's a model for equitable excellence – where quality meets compassion without compromise.

## **Liver Diseases – A National Challenge Demanding Collective Strength**

Liver diseases are among the world's top 15 causes of disability and the 11th leading cause of death, claiming nearly 2 million lives annually. In India, cirrhosis and liver failure contribute to nearly 5% of all deaths, often striking individuals in their productive years.

Liver transplantation is the only definitive cure when more than 90% of the organ fails. Yet, cost remains the greatest barrier – until now. Through this MoU, Saveetha and Apollo are shattering that barrier, bringing the same world-class transplant success rates (90% 10-year graft survival) to the common man.

## **A Visionary Partnership for India's Health Future**

Present at the signing were Dr. N. M. Veeraiyan, Founder and Chancellor, SIMATS; Dr. Deepak Nallaswamy, Pro Chancellor,

SIMATS; Dr. Ilankumaran Kaliamoorthy, CEO, Apollo Hospitals, Chennai; Dr. Elankumaran K, Head, Liver Diseases & Transplantation Institute, Apollo Hospitals; and Dr. Murugan N, Senior Consultant and Transplant Hepatologist, Apollo Hospitals.

This collaboration represents a shared commitment – Apollo's medical precision meets Saveetha's social mission. Together, they are rewriting the healthcare narrative – where premium medical excellence meets public affordability.

### **About Saveetha Medical College & Hospital (SIMATS)**

Saveetha Medical College & Hospital, part of Saveetha Institute of Medical and Technical Sciences, is among India's fastest-growing and most awarded medical institutions. With state-of-the-art infrastructure, over 42,000 research publications, 3,800+ patents, and a consistent NIRF Top-15 presence, Saveetha continues to lead India's transformation in education, innovation, and accessible healthcare.

At Saveetha, medicine isn't just practiced – it's reimaged for humanity.
